

Key Features

**Soybean
Variety**

- **A Top Performing RR2 Variety that competes extremely well with .07-1.2 RM**
- **Adapts well to northern environments**
- **Plant early, harvest early.**

LS0710RR2

0.7

Relative Maturity

Characteristics

Plant Type	M	Hilum Color	IB
Plant Height	30"	Flower Color	P
No-Till Adaptability	1.5	Pubescence Color	G
Shatter Resistance	1.5	Pod Color	Br
Field Emergence	1.3	Protein	A
Standability	1.2	Oil	A

Type and Height:

B=Bushy
M=Medium
Sh=Short
T=Tall
Th=Thin
UB=Upright Branching

Protein:

A=Average 35-40%
H=High 41-45%
VH=Very High 45-50%

Oil:

A=Average 18-20%
H=High 21-24%

Soybean Cyst Nematode:

S=Susceptible
Seg=Segregating
R=Resistant
MR=Moderate Resistance
LR=Low Resistance
#=Race 1,3,9, or 14

Color:

Bl=Black W=White
Bf=Buff Y=Yellow
Br=Brown
G=Gray
IB=Imperfect Black
Lt=Light
P=Purple
T=Tan
Tw=Tawny

Rating Scale

1=Excellent
5=Poor
