

Key Features

- **Excellent white mold tolerance that allows every branch to be loaded with pods for high yields.**
- **An excellent companion to LS0710.**

Soybean Variety

LS0810RR

0.8

Relative Maturity

Characteristics

| | | | |
|----------------------|-----|------------------|-------|
| Plant Type | B | Hilum Color | Brown |
| Plant Height | 29" | Flower Color | W |
| No-Till Adaptability | 1.0 | Pubescence Color | LtTw |
| Shatter Resistance | 1.0 | Pod Color | Brown |
| Field Emergence | 1.0 | Protein | H |
| Standability | 1.4 | Oil | A |

Type and Height:

B=Bushy
M=Medium
Sh=Short
T=Tall
Th=Thin
UB=Upright Branching

Protein:

A=Average 35-40%
H=High 41-45%
VH=Very High 45-50%

Oil:

A=Average 18-20%
H=High 21-24%

Soybean Cyst Nematode:

S=Susceptible
Seg=Segregating
R=Resistant
MR=Moderate Resistance
LR=Low Resistance
#=Race 1,3,9, or 14

Color:

Bl=Black W=White
Bf=Buff Y=Yellow
Br=Brown
G=Gray
IB=Imperfect Black
Lt=Light
P=Purple
T=Tan
TW=Tawny

Rating Scale

1=Excellent
5=Poor

LS0810RR

Disease And SCN Resistance Ratings
