| DISEASE RATINGS           | MY NOTES |
|---------------------------|----------|
| White Mold                |          |
| PRR FT                    |          |
| PRR GENE                  |          |
| Iron Chlorosis (IDC)      |          |
| Brown Stem Rot            |          |
| SCN                       |          |
| SDS                       |          |
|                           |          |
| AGRONOMIC CHARACTERISTICS |          |
| Standability              |          |
| Emergence                 |          |
| Stress Tolerance          |          |
| Plant Type                |          |
| Plant Height              |          |

**Rating Key:** EX = Excellent | VG = Very Good | G = Good | S = Susceptible | R = Resistant | NA = Not Available | FT = Field Tolerance  
**Diseases:** PRR = Phytophthora Root Rot | IDC = Iron Chlorosis | BSR = Brown Stem Rot | SCN = Soybean Cyst Nematode | SDS = Sudden Death Syndrome
